2. (S/NF/SK) The target was the small Kingdom of Brunei located on the northwest coast of Borneo. The Sultan of Brunei is reported to be one of the wealthiest men in the world, if not the richest, and resided in an opulent and gigantic palace containing literally hundreds of rooms. The populace of Brunei, on the other hand, are common working people residing in small huts. Some of the huts along the brilliant coastline are traditionally built on stilts to allow for the great seasonal variations in tides.

3. (S/NF/SK) Source correctly reported on man-made structures as, "foundations, giving support, curving, shaped out, in a circular area, (perhaps the circular harbor). Source then moved to a higher elevation, "moving up", where it should be noted the Sultan's palace is located in a natural setting overlooking the ocean. Here Source reported the structure in geometric terms, i.e., "square, round, triangular, massive, curvy, divided" and finally, "man-made but made into the structure...hollow inside, large rooms, wide open hallways..." Source also reported on the concept of "serving" associated with this structure. All in all, when the lesser relevant descriptives are combined with the more easily recognizable data, the session went remarkably well with most of the major gestalts accurately reported to include very clear references to the huts on the coastline built on stilts described by Source as "poles" and "foundations".

At first I saw many
Many shapes I saw wide
triangles, I saw little thin
curves, I felt I was in
Somewhat of a circular area.

I felt at first I
was looking at hard man-made
structure or structures, I sensed
people perusing. I sensed
foundations. The area was
massive, the land was dry.
I was in a natural setting.

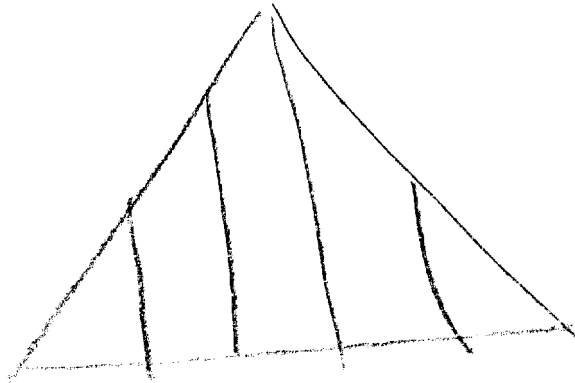

I then saw the area
in a different perspective. I heard
water & then I could feel
water hitting large stones
or rocks. I then had the strong
impression that what I was
looking at was a very natural
structure or structures & was
being utilized by man. Somehow
man made the ~~at~~ natural
~~structure~~ structures to serve him.

I went inside & saw large
Cold rooms. Not pleasant. The
areas were divided. I felt
that noise sounded ~~to be~~ louder
than it actually was in the
structure. I sensed ~~per~~ non-
emotional people. I sensed
large doors or gates opening &
closing - slamming & it was loud.

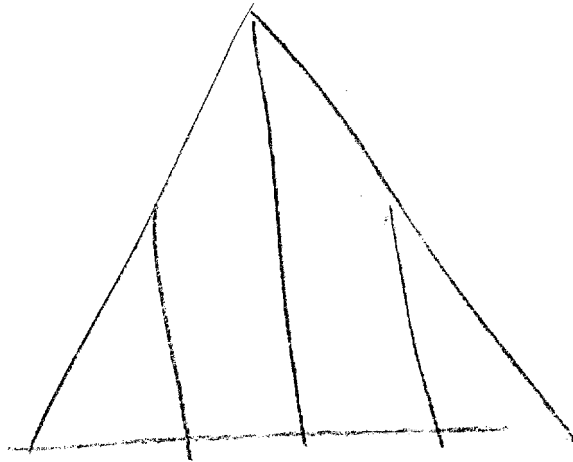

I kept sensing foundations
& then I saw piles coming
out from, standing upright
coming from the foundations
or bases. There were
circles ~~of~~ ~~around~~ ~~the~~ ~~structures~~. Inside
the circles were moldings.

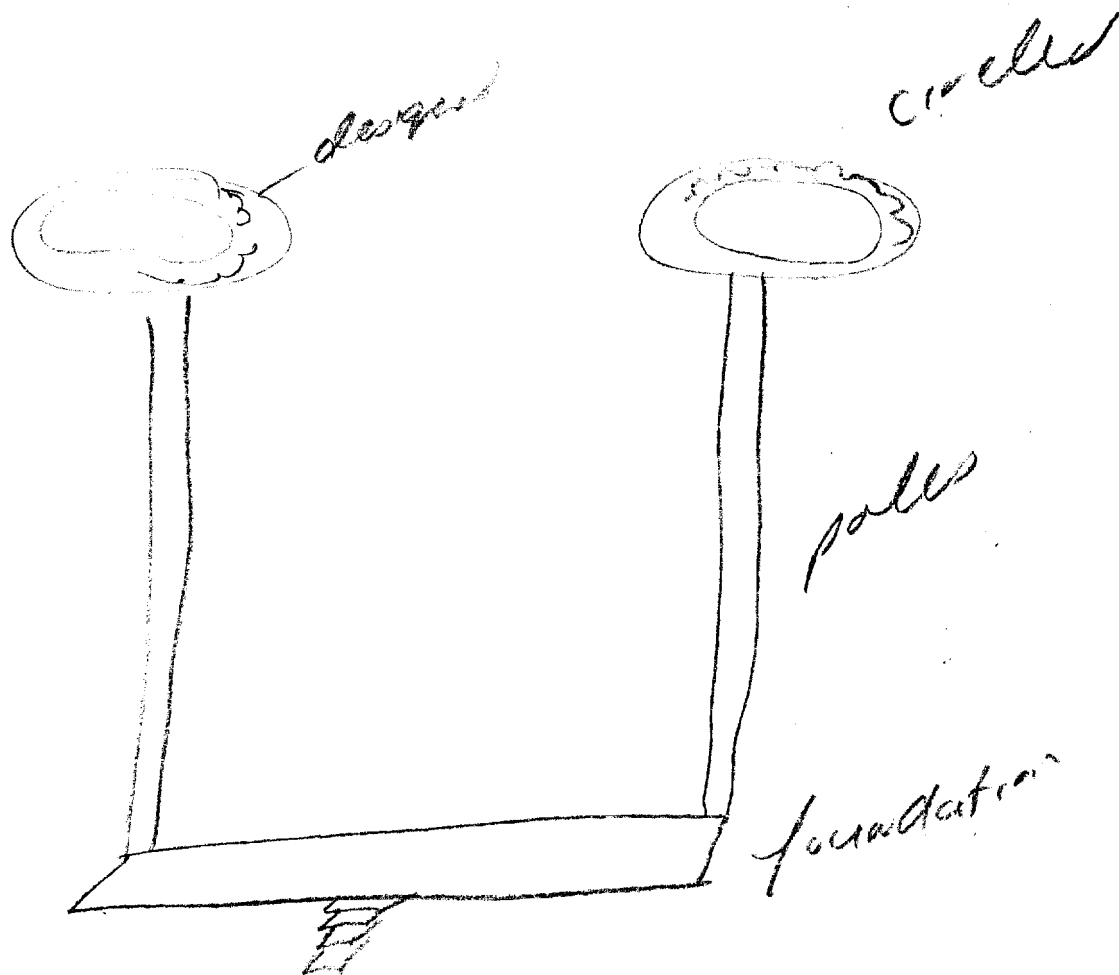

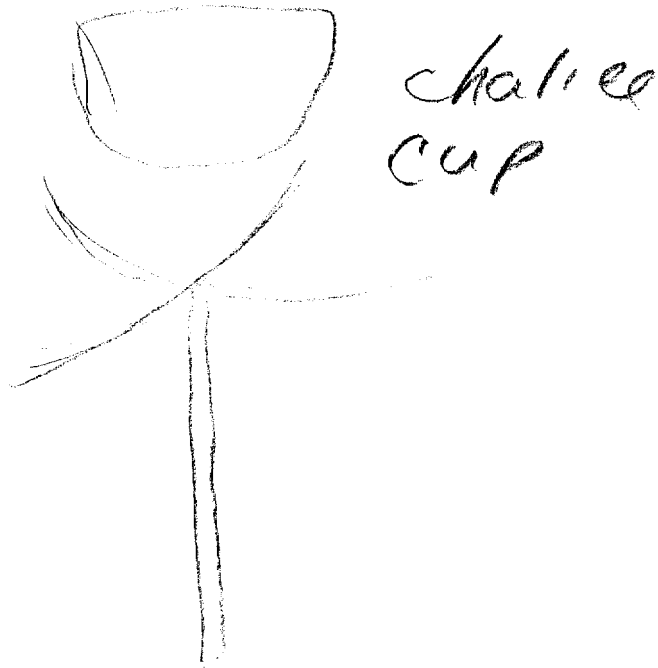

I was
I supposed
be here.
