SUMMARY OF INFORMATION

The site is a structure that is big and strong. It is light brown and wooden. The structure is placed within a city area.

There is sea and sun here. I also had the feeling of sand. The structure could be placed in an industrial park. There are black walls and glass windows associated with the structure.

The work being done inside the structure is one of an experimental nature. There is security awareness here. There are subdivisions here. The structure supports systems. The work has something to do with tables of distributions and allowances.

The work is people oriented and people here think and work on ideas. Then there ideas may be tested. People write manuals on technology. The tables can inflate something. Tubular systems are here also. It is very clean here. The people could be working on environmental issues. Working on robots is also done here.

Cellular communications is also work being done here. [redacted] and Germany, United States, and Japan are countries associated with the work here. In the future, the structure will go into more subdivisions.

The name "Hearts/Hertz" phonetically surfaced as a name associated with the site.
