PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER:	0225 (Tng)	SESSION NUMBER:	1
DATE OF SESSION:	05 OCT 90	DATE OF REPORT:	12 OCT 90
START:	1328	END:	1409
METHODOLOGY:	ERV	VIEWER IDENTIFIER:	079

---

1. (S/SK) MISSION: To describe the target site (Sugar warehouse, Sugarland, Texas) using ERV methodology.
2. (S/SK) VIEWER TASKING: None
3. (S/SK) COMMENTS: Physical Inclemencies: sleepy. 079 began without cueing, being immediately attracted to the most active part of the site (the machinery). ADL set in and was never completely cleared, even after several instructions to move to different parts of the site. Valid descriptors were, nonetheless, produced. Session transcript and veiwler's summary are attached.
4. (S/SK) EVALUATION: *3*
5. (S/SK) SEARCH EVALUATION: N/A.

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY

SUMMARY OF INFORMATION

There is an object at this site which is important. The object is circular and it spreads out. There is a pushing movement involved. Men work here and they are pushing forward and moving. The object can be powerful. There is one piece connected to the object which is linear. This could be the driving force. There is a circular motion and it seems that although there is motion, the object stands still.

I feel that the work here is technical in nature and the men seem serious about their work. They look up and examine their work. There's a switching and a pulling effect. It seems that there may be a moving vehicle involved (train or plane) associated with the site. Although some of the work goes on outside, the object has an important compartment inside. A man sits on a chair and to the side of him may be a window. The man looks forward.

Overall the site is isolated, awesome, and noisy. The noise shoots straight up.

Sometimes it looked as though people were upside down. It looked as though people were flying at times. It also looked as though statues or monuments were here.
