Site involves a land/space interface. White is important color; rounded components are salient, suggesting a "dome-like" nature. ~~There~~ There's a sense of something "swirling" at the site, of a seemingly nebulous consistency. Scales of site components seem rather large.

vaccatode

Something describing a swirling/circling/
circular pattern of motion. Land is around it.

There is a manmade structure/structures associated
with it. Motion is a very important element at
the site. White is prevalent as a color, as is "roundness"
as a dimension. AOLs of things like vaccatodes & sports
stadiums are suggested.

Site conveys strong impression of ~~an~~ ~~activity~~ ~~involving~~ ~~intensive~~ ~~motion~~
 or a similar activity involving intensive motion.

Circular movement is important, but there is other activity that is not patterned in execution - almost random. Amusement Park is another strongly suggested AOL. A high level of excitement is present; people involved ~~are~~ seem to be present for thrills, edification, enjoyment, thrill seeking, etc.

Seems to be somewhere in
