B. structure

Site is a structure or structures, ~~multi-dimensional~~  
both in heights, shape, & widths in an arid, rocky,  
hilly, sandy region, with apparently little vegetation.  
Confusion exists as to whether water is present or an  
extensive sand dune area.

Structures at site are strongly suggestive of Greek ruins;  
 Walls are present, + seem to be old + unexcavated for. Structures  
 + parts of structure made of <sup>beige</sup> stone + perhaps other natural materials  
 are raised up on or on top of something. Deep ravines or  
 canyons seem to be important elements of the site.
