Site consists of man-made structures located on a slope under a hill. These structures are made up of squares, rectangles and box-like shapes, almost like a group of buildings making up a small village. Beneath one of the structures there appeared to be a cave-like, dark, wet, musty passage. Inside one of the structures was an object. This object appeared to be made of stone of a dark color. It was very hard, black and shiny. This object appeared to be approximately 6' long by 3' wide and was hollow inside. It was rectangular in shape and approximately 3-4' in height.

~~SITE~~ APPEARS TO BE A CEMETARY
