17 DEC 86

SESSION SUMMARY

SITE: MEDJUGORJE, YUGOSLAVIA

..... very difficult time today..... Stage II will probably be my hardest stage..... for now, at least, the process of trying to figure out where to put words under the correct column tends to break contact with the signal line. BUT, WE WILL MISS LARGE AMOUNTS OF DATA OTHERWISE, ONLY THAT WHICH YOU FEEL IS SIGNIFICANT WILL BE DISJECTIFIED. WE NEED MORE FOR ANALYSIS.

It is very difficult to really draw any conclusions concerning this session due to the excessive ambient noise surrounding the entire effort.

SOME INTERESTING SUSPICIONS CONCERNING THIS SITE WHICH MAY BE USEFUL FOR FUTURE CUEING:

..... suspect this site has had religious significance since prehistoric times.

..... the most recent event is not the first phenomena that has been observed at this site.

..... there is something very significant about a well... not manmade, but natural (like a cave or grotto)

..... there also appears to be an energy vortex associated with this site, rotating in a clockwise direction

..... the present structure may have been constructed over the ruins of a prehistoric structure.
