SECTION II

This section deals exclusively with the accuracy of the information provided in this report only. Disregard any previous data or IES forms you may have already received when completing this section of this form. Responses are scaled from 0-4 utilizing the following explanatory criteria:

- 0 - Little or no correspondence with known or suspected components of the target site.
- 1 - Evidence that the proper target site is being described, however the information contains a mixture of correct and incorrect elements.
- 2 - Good site correspondence with several items recognizable or confirmatory in nature but some incorrect or irrelevant information is reported.
- 3 - Good correspondence with the target with unambiguous and unique information and relatively little known incorrect information.
- 4 - Data correctly fulfills tasking in a manner which positively enhances current holdings and operational interest in this site by reporting on heretofore unknown data.
