4 1/2 - a very large device/machinery. It either produces or requires a lot of electrical energy. The people I have perceived so far are technicians/maintenance type personnel. Their job is to keep things running smoothly.

Site consists of a structure that has angles and is curved/domed. Inside the structure cool, grey, concrete. Point A is round, curving, arched, hard rough rock. Point B is lighted.... pale yellowish green. It is round, circular, horizontal and empty. Point C is round, rounded... horizontal and vertical aspects here. There is a very large device that is grey, square/rectangular that either produces or uses large amounts of electrical power. There are people here that have the job of keeping this device running smoothly. Point D... sounds of clanging, banging. ⑤ doorway, steel, people here are off-duty relaxing.
