SG1A ~~(A)~~: A)

c) ~~Amplifying~~ Amplifying instructions: none

2. (S/NF/SK) Session: Conditions were encrypted in the usual manner. A significant problem became apparent early in the session, to wit, the only good reference point ^(sterum) was psychically similar to the target, ~~wood~~ ^{wood} (domed structure). Consequently, some confusion on the part (in the ~~source~~ mind) of the monitor overlaid the session.

3. (S/NF/SK) Summary: ~~Wood~~ Site is a land/structure/water interface. Several structures are present; ~~all~~ some are rounded. One structure is long, wide, deep (below ground level), open at the top but, perhaps, can be covered over. Something is constructed in this "bay" structure ~~which~~ is that is very large, has many rounded surfaces and which, when ~~wood~~ ^{completed}, is ^{apparently} moved out ponderously ~~off~~ into water. ~~It~~ A strong association is present of a drydock ~~area~~ and a ship or submarine.

4. (S/NF/SK) Feedback: ~~Wood~~ ~~Site~~ During discussions with ops officer, monitor suggested that data regarding ~~Wood~~ ^{sub construction} bay was probably AOL drive. Ops officer agreed, and requested source rework the target.
