PROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 'I-2'
Date of Session	: 12Dec86
Date of Report	: 12Dec86
Session Number	: CRV-02
Source Identifier	: RV-003

09953
0853

1. (S/NF/SK) Tasking: See original tasking data, attached. Ops officer is of the opinion that this source may have correctly identified a central "theme" of this mission, to wit, that the idea of technical "tampering" may be present.

2. (S/NF/SK) Session: In monitor's opinion, source was definitely "on line" and performed excellently. Session began in S4 after source probed ideograms produced in CRV-01. S6 followed with source being instructed to draw a "bubble" around the object that he had perceived and described while, at the same time, following along a time line the information passing in/out the bubble.

3. (S/NF/SK) Summary: Site involves an event or project which proceeds in stages; planning, preparation, execution and concurrent evaluation. A moving object, which seems to be in flight, receives information in the form of "data". This data acts to "verify", "control", "divert", "supervise", and "verify status". The concept of a "strict performance envelope" is included here, also. The project has the sense of "quasi-legality" in that the people at the site feel that their activity would be "frowned upon" by a "third party" if they became aware of it; it would "evoke a feeling of betrayal or unfairness as [the activity] is occurring even though the perpetrators said that it wouldn't based upon mutual agreement". However, the people at the site "felt the necessity to conduct it nevertheless—ends justify the means".
