

① Very short Ideogram

As you have been at this target before. I have not read your report since it was conducted between you and Ed. Suffice to say you may recognize this target early in its session. Continue to report in it and as always continue to report on the ultimate question pertaining to the target "

Isolated structure

Flat, small, metallic/concrete feel

People in white smocks, busy, scurrying around, pressure to perform

1-2 Folder retrieved - Summary read to source. Said he believed people in smocks are important so this aspect would be pursued.

You have begun describing two kind of people TAN & Green. This is well and good as we progress I am certain their images will become much more differentiated. For now however lets examine their separate activities w/ the Green people.

lets look at the instruments to determine the activity component

How do you feel that you can acquire more information on the site or the object bearing in mind that the object is only a component of the site whether it is the central or only peripherally important component. To having some difficulty interpreting the object so perhaps we need to pursue some other channel to gather further clarifying data. How do you feel that can be accomplished -

ANS: Time line.

OK: now on a separate sheet of paper make a timeline. Then indicate the point where the object can provide for the greatest amount of information. Staying in kinesthetic contact with this point - instruct on its purpose
