## SECTION II

This section deals exclusively with the accuracy of the information provided, not its usefulness. Responses are scaled from 0-3 utilizing the following explanatory criteria. If a source has not addressed a particular item then select UNKNOWN. If a source describes an item which cannot be verified then select CANNOT BE DETERMINED.

0 - Little or no correspondence with known or suspected components of the target site.

1 - Evidence that the proper target site is being described, however the information contains a mixture of correct and incorrect elements.

2 - Good site correspondence with several items recognizable or confirmatory in nature but some incorrect or irrelevant information is reported.

3 - Good correspondence with the target with unambiguous and unique information and relatively little known incorrect information.

- |   |                                       |                              |
|---|---------------------------------------|------------------------------|
| IIa - Geographic locale description, i.e., terrain, bodies of water, mountains, etc.                      | 0-3<br>2                              | UNKNOWN CANNOT BE DETERMINED |
| IIb - Large scale manmade objects, i.e., cities, rail yards, silos, docks, etc.                           | 2                                     |                              |
| IIc - Small scale manmade structures, i.e., antennae, computers, vehicles, missiles small buildings, etc. | (NOTE IIC and IID apply concurrently) |                              |
| IIId.- General target functions, i.e., research, production, training, storage, troop billets, etc.       | 2                                     |                              |
