The exercise will be done by the military for defense purposes utilizing large scale employment for a short duration. The planned activity is part of a on-going project with a new purpose.

There are communications at the site. The exercise takes place on land located in an area near beige and brown connected housing similar to town houses and a short chain link fence. Trees may be in the vicinity. The exercise has an American - European or possibly Hispanic flavor.

The event is for testing equipment or weaponry. Long thin objects are utilized with a rounded bottom which has light emanating from them to a vantage point. These objects can penetrate the earth. Books have images of these objects which have a ground - land forces utility. The objects are mounted to happen in term. Many duties will be performed through this exercise which once begun will take more than a few days and no longer than a week to occur.

- E. SESSION SUMMARY:

Major air/land operation within southwestern Asia. I sense that the premise for this exercise is counter-nuclear in nature. The scenario I sense is that of a conflict between two or more countries or political entities getting out of hand and threatening the security of nukes which may be owned by a nearby country or province; or possibly by one of the participants themselves.

I sense a pincer type movement with smaller units acting as obstacles while a larger unit(s) moves towards the former, squeezing whatever or whoever may be between them.

I sense a very rapid movement of all groups involved with this operation. There is a touch of reality in this...in that this may, in fact, be used as an opportunity to carry out exactly what the predictive model was planned to do...very smart, guys!!!
