DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:

SG1B

-- The target [] is associated with a rounded land area location which is by water and rocks. This area is foreign and has an old land feeling. (Married people at this place wear wedding bands on their opposite or right hand and some children can even be found at the site). Planes fly overhead and are capable of monitoring activities below from above and there is a city of interest with structures related to the target. This place may be known for illegal activity to include smuggling, contraband, connections, drug drops etc. Items are shipped or transported from this location over the ocean to other areas within the United States as a money making business. Certain men of power in groups or drug rings are regularly involved in these activities. One man of interest in particular has blue eyes and graying hair.

- (S/NF/SG/LIMDIS) Source B:

SG1B

-- The target [] is a trawler, possibly a shrimper, which has two long booms extending backwards. These booms angle both upwards and outward from the center of the vessel. It has a white hull with faded red elsewhere; probably as a border along the deck level. The concept of "harbor boat" is also associated with this target (attachment A).

-- This vessel acts as a "look-out" for the network. It "runs" interference and acts as a ploy or decoy. It rolls a lot; it doesn't seem to handle waves too well. Excessive rolling from side to side. Objects appear to continually slip into the water.

-- The network is involved with heroin or hashish from Asia (a substance that begins with an "h" at any rate). It is hidden in wooden toy figures; animal figures. Frogs, dogs, mushrooms and dolls were perceived, albeit in a jumbled array.

-- I sense that the operation is close to occurring because of my picking up a serious concern with the weather and fog by individuals associated with this network. A transfer will occur at sea.

-- An emergency will be faked; used as a guise to distract from the operation occurring. Railroad tank cars will be also be involved in some way.

SG1B

-- Other concepts, attributes and/or features associated with are:

--- clear water; a holding tank; flooding; and a pool of water which appears "suspended".

--- black or dark green blocks or crates; black and metallic; raised; and rippled.

--- shaft or hold area.

--- crumbled up photograph of a female.

--- the concept of something being "halved".

--- the concept of submerged.

--- flat wooden railing and a star-shaped cutout area of a wall or panel.

--- 65 pound packages.

--- a dog's name.

Source's Note: I perceived my throat tightening and having a chemical taste in my mouth during this session. This has been a definitive indicator to me in past operations that illegal drugs are involved with the target.

- (S/NF/SG/LIMDIS) Source C: (Additional Data)

-- Activity consists of men carrying large square brown boxes or crates. Overall activity is drug related. It looks as though the men are in a large square structure that looked like a warehouse. Water could be near this structure.

-- The men are moving the boxes or crates and it could not be determined if the men were carrying the boxes or crates inside or outside.
