(U) PREFACE:

(S/NF/SG/LIMDIS) The Special Activity Report is part of on-going taskings [REDACTED]

SG1H

[REDACTED] The information provided in this report was generated by PAG-TA employing remote viewing (RV) methodologies.

(S/NF/SG/LIMDIS) The data provided in this project concentrated on a target viewed by a beacon person. The results were forwarded [REDACTED] via secure fax. [REDACTED] evaluation feedback is at Appendix B.

SG1H

(S/NF/SG/LIMDIS) The methodology used in this activity is exploratory. Results should not be considered as stand-alone; but used or evaluated in conjunction with other proven data sources (HUMINT, SIGINT, IMAGERY, OPEN SOURCE, and/or MASINT). Generic data (e.g., general shapes) are more reliable than specific data (e.g. dimensions, names).

SPECIAL ACTIVITY REPORT
PROJECT NO. 93-218-P

DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:

-- In route to the target many images came to mind. The territory is sparse in a town which has people, roads, and spacious countryside. Rolling hills or mountains are in the surrounding area and a shore with boats. There are structures on or by water. There are many houses with land. For example, one structure of interest appeared to be a white house with a front porch (sketch 3a). This structure has trees and a fenced in yard with fields. There may be some farming in this community.

-- There are animals in the target area to include a dog, cat, horses and a red barn. A large and somewhat tacky sign off the road displays either the name of a store, or where people come to trade with money. A race track or a form of racing may be in the area.

-- An object which moves around in a circular fashion with propeller shaped wings or tips is active at the target (sketch 3b).

- (S/NF/SG/LIMDIS) Source B:

-- The target contains the perception of a rapid, downward and directed movement of water over a series of angularly shaped features (sketches 3c and d). There is a sense that the water "separates from itself" and then "rejoins itself" (reminiscent of water running through a series of

ponds/pools or through a grist mill). There is an area where the water is very smooth and almost glass-like in appearance. It is circular in appearance and feels like a pond or pool.

-- There is a high feature or structure which is of concrete construction. This is associated with electricity or electrical equipment.

-- There is also a structure which consists of a series of adjacent, similarly shaped features which occurs within the vicinity of the aforementioned. This structure or feature is a conglomerate of shapes and lines (to include curved or angled tubes or pipes) and is also somehow associated with electrical equipment.

-- There is a sense of "forward" movement; that is, a concept of "pushing ahead" i.e. like parting something to get through it.

-- There is also the concept of large, door-like features which swing open and close. The concepts of "covers" and "lights" are also associated with the target.

-- Other features associated with this target are depicted and explained on (sketches 3e and f).

- (S/NF/SG/LIMDIS) Source C:

-- The site consisted of a large circular area that was broken at some portion (sketch 3g). People can walk up and down this broken portion (sketch 3h). The site consisted of a very large rounded structure with a pointed roof (sketch 3i). The structure had many sides to it. The structure was dark in color. The structure reminded me of a castle. The structure has many entrances and doors. One inside the structure, I could see black doors. At one point inside, it seemed that when you opened one door, there was another door. People inside the structure seemed serious. I had the feeling that more females are inside the structure than males.

-- Water is at the site and it is important to the site (sketch 3j). There was a small square object at the site that looked like a vehicle of some sort (sketch 3k). This object was opened in the back and in the front it looked like it had a "sun visor."

-- There was a second object at the site that was tall and looked like a large "water fountain".

LIMDIS

~~SECRET~~

-- The overall site was very large and took up a great deal of space however, I felt that I was in a city. There were city noises in the background.

-- The structure's purpose was one of work and healing.

- (S/NF/SG/LIMDIS) Control Person:

-- I perceived a strong feeling of energy, something blowing out of a hole. I also portrayed an airplane so consequently the energy felt could possibly be the engine of the aircraft. I also sensed a tower or tall structure (sketch 31).

TARGET

~~SECRET~~

IMAGE MESSAGE TRANSMISSION

DATE: 931119

TIME: 0900 - 0930

DAY : FRIDAY

LOCATION: FORT WALTON BEACH FLORIDA

WEATHER: 57 degs, light winds, clear sky

CONDITIONS: WHITE SANDY BEACH WITH SOUNDS FROM OCEAN WAVES

PHOTOGRAPHS: Three photos were taken

SUBJECT: Sitting on white sandy beach looking out across large body of water (Gulf of Mexico). Quiet, except for sound of waves washing ashore, no other people on beach. Concentrating only on large body of water with white sandy beach.
