E. SESSION SUMMARY:

The site consists of
a land/water interface
with at least one structure
(impression of more).

The water portion of the site is not level,
appearing to be a waterfall or rapids,
causing a "wet spray" in the air,
and making a roaring sound
which is multi-toned
and of constant loudness.
Parts of the water appear to be hard (frozen?)

Land exists on two opposite sides of the water,
in close proximity.
