

WORKING PAPER

Target #: SPT-2
Date: 21 MAR 91
Time: 1340-1452
Viewer: 052
Session: 01
Method: CRV
Monitor: 049

SUMMARY OF INFORMATION:

The target is a round structure. There are many people sitting around in little seats in an old building, see sketch. They are watching some kind of activity going on in the middle of the structure, which is a wide open area. They are looking down on it. There is much movement. The people are talking, yelling and looking at something. It is very loud. There is a strong smell, kind of sweet, associated with this site.

At first I saw the structure as "light-bulb" shaped, but more rounded. It is very bright, which makes me think that it is a open structure (without a roof). There is something dark in the middle of it and something long and narrow sticking out of one end of the top. This target has much activity or energetics associated with it. Things seem to be moving in waves. Colors evident are blue, green, and brown. There is a crowd of people at the target and it is very loud. Many of the people have dark brown or black hair. Their overall feeling about this activity is enjoyment and excitement.

SESSION #2, 22 March 91, 0924-0958, ERV

There is one man with brownish black hair, six feet tall, wearing a white shirt and black jacket and pants, who is directing this activity. He is directing it to "move". He is located in the middle of the structure, but more off to one side. He is waving both of his arms, which makes me think that he is a conductor. The movement of the activity is narrow shaped heading from left to right. It seems to be moving towards an opening at the bottom of this structure. All the people seem to be watching this.

There is also something very bright that is moving up. There is a strong smell, like fumes of smoke, associated with this thing moving up. There is something that is zig-zag shaped, sharp ups and downs, and something star shaped. There is also something elastic that expands and contracts or moves back and forth. It makes me think of a rubber band, but it is much larger.
