

SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8807 SESSION NUMBER: 4
DATE OF SESSION: 09 MAY 88 DATE OF REPORT: 10 MAY 88
START: 1343 END: 1406
METHODOLOGY: *C/ARV* VIEWER IDENTIFICATION: 003

1. (S/NF/SK) MISSION:

- a. To access and describe the target structure at encrypted coordinates 913801/893723, along with its surroundings.
- b. To describe the purpose and use of items of significant intelligence interest found in the structure.

2. (S/NF/SK) VIEWER TASKING: Same as 1., above.

3. (S/NF/SK) COMMENTS:

- a. Inclemencies: none
- b. This session proceeded from the findings of the previous session. Basically, the same impressions were gained. 003 searched for new impressions, heretofore undescribed objects, and differences in perceptions between this session and last, but found none.
- c. An in-depth description of the people involved with the site was settled on. One site personnel was accessed, and information about this topic was the main result of this session.

SECRET/NOFORN

CLASSIFIED BY: DIA (DT)
DECLASSIFY: OADR

There are people of differing grades or levels associated with the site; some are chiefs, some are Indians, some in between. Specialties. Certain technicians can only work on certain aspects. This has to do with both turf and efficiency/safety. A few manager types oversee and coordinate rest of "labor" force. One person here is younger, mustached, good-natured, and a little idealistic and naive, like an "apprentice." He's excited about his job. He is specialized, and has to do with fitting, connections, tubing, "like" a plumber, but more precise and specialized. Special access must be allowed to be here. It is a privilege. A person gets certain perks for being involved, and it is understood that these are in return for closed-mouthedness. People here know that if they're too careless about what they say about their job, they not only get taken off it, but lose their special benefits. Patriotic feel--for the good of the "Motherland". New development to foil the plots of enemies of the homeland. Again impression of nuclear engineering. Words like induction, flux, impulsion, capacitance, pressure containment, closed system are involved. Feeling of immense directed power or forces controlled and channeled. Power/force levels start out low but build up to huge concentrated energy/power levels that are all contained within the constraints of the [Anlage]. This energy never seems to go anywhere or do anything else. It's developmental, experimental, high-tech, exciting for the people involved, and has some sort of significant application for national strategic goals--not necessarily military, but also economic. AOL break of an externally cooled supercomputer.
