PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8813 SESSION NUMBER: 06
DATE OF SESSION: 25 AUG 88 DATE OF REPORT: 25 AUG 88
START: 1015 END: 1140
METHODOLOGY: WRV VIEWER IDENTIFIER: 079

1. (S/NF/SK) MISSION: Determine and describe the nature, scope and imminence factor of terrorist activity directed against US interests and projected to occur in the areas of USAREUR and PACOM.

2. (S/NF/SK) VIEWER TASKING: Viewer tasked with updating and refining data previously furnished in reply to mission tasking reflected in Para 1, above.

3.
(S/NF/SK) COMMENTS: No inclemencies noted. The results of the topical searches were conducted during the aftermath of the downing of the Iranian Jet Bus incident by the Vincennes. In terms of remote viewing, working in future time and in a predictive mode against acts of terrorism directed against US interests represents the least marketable result this form of collection can offer. The attached Summary of Information is submitted with the hope that WRV as a new methodology in the area of remote viewing, can provide exploitable indicators on how to cope with the phenomenon of time.

4. (S/NF/SK): EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY

WORKING PAPERS

SUMMARY OF INFORMATION

An estimated 328 delegates are anticipated for a "NATO/SHAPE intelligence oriented conference" in September 1988. Bomb threats are being directed against the structure described as the "Convention Center", a large grey stone building that resembles a church. It is anticipated that bomb threats will be made against the Supreme Headquarters Allied Powers Europe (SHAPE), Maisieres, Belgium. The perpetrators comprised of a small group of independent, rabid extremists known mainly for their bomb threats (rather than for acts of kidnapping) have a list of attendees and pictures of some the personnel in their position. Personnel remaining in hotels/motels are also vulnerable at the time of the conference.

An estimated 27 members of the Red Army Faction utilizing "hit and run tactics" and driving "new shiny" cars will attempt to penetrate the naval base (considered an accessible soft target) at Iwaki (Taira) Japan, to set fires, as well as to maim and kill personnel. The dates of 18 September 1988 and November 1988 surfaced as potential target dates. It is anticipated the target date will coincide with the presence and speaking engagement of a one or two star naval officer whose name was phonetically described as "Saunders/Souers/Sowers."

[The political demise of Mrs. Aquino as the Philippine head of

state will occur within a period of six to nine months from this date; in any case, Mrs. Aquino will no longer be in power in an year from now. Riots attended by thousands of people and directed against the US Air Base located in the vicinity of Tinaca Point, The Philippines, will mark the beginning of a continuing deterioration of Mrs. Aquino's grasp of power. The riot will take place within the October 1988 time frame. "Stations and sub-stations" have already been alerted to the possibility. It was estimated on a long term basis that a conservative military officer would finally bring some sort of control in the Philippines in about two years from now.

An estimated ten terrorists (or formerly active European terrorists) are in the process of surveilling the routes of travel as well as the security aspects of the home of Col John Abrams. The intent is to kidnap Col Abrams for ransom so that the terrorists can leave/retire from Germany to Switzerland and/or Bulgaria. Col Abrams will be most vulnerable during his route of travel between home and his military place of assignment. Col Abrams was selected as a target because of the military prominence of his father. The initiation of a surveillance will provide the tip off confirming the validity of this information. (COL Abrams in this report may be identifiable with COL John Abrams believed to be assigned as Commander, 11th Armored Cavalry Regiment, V Corps - The name Col Knox was mentioned in a previous report - Clarifying data obtained this date, indicates that Col Abrams was trained/associated with Fort Knox; evidently there is no Col Knox).

CH, DT-S feels very uncomfortable with the data provided above. There is no viable, established track record or basis that can be cited in support of its credibility or marketability within the intelligence community. Information of a non-predictive nature obtained via this previously untried methodology appears promising but inconclusive because of a lack of an established data base (precedent) from which to assess its value even as a potential tip-off used in a multi-discipline mode.
