PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8907	SESSION NUMBER: 2
DATE OF SESSION: 890222	DATE OF REPORT: 890224
START: 1400	END: 1445
METHODOLOGY: CRV	VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Access and describe the target building.
2. (S/NF/SK) VIEWER TASKING: Coordinates.
3. (S/NF/SK) COMMENTS: 003 spent the first half of the session off target. He then took a break and the session was resumed from stage 1. 003 then appeared to get on target. Next session will be spent describing the "building of interest." (cue to be used).
4. EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY  
SPECIAL ACCESS REQUIRED

~~SECRET~~/NOFORN

CLASSIFIED BY: DIA (DT)  
DECLASSIFY ON: OADR

*oh -*

*- need further w/ appreciation of (awesome) dimensional aspects of the building.*

*- Ultimate goal here is to determine the nature and scope of a developmental activity, if any!*

First portion of session described a large object and a structure of unusual dimensions, but may have been influenced by AOL/D or accessing a different site.

Actual reported site involved a complex compound surrounded by a fence in the lee of a terrain feature in an area that is dark alot. The area is patrolled, is isolated, cold, maybe snowy, with pools of light here and there. There is a sense that this place is official, important, highly secure, well staffed and maintained, very active, and is very serious/sober/professional. A military connection of some sort is present--not specifically army/navy/air force, but like a different branch altogether. The system is not like the US'. There is a sense of a roof with miscellaneous items on its top, and a structure that involves operations, thinking, putting together, arranging, directing, controlling, A/S "like" the idea of some sort of "nerve center." There was a further impression of some sort of object that was curving and hollow and served in conjunction with another similar object and opposing halves to join two long cylindrical sections of something together (see sketches pp. 10,11). Object are pressure/force/stress and heat resistant.

metal

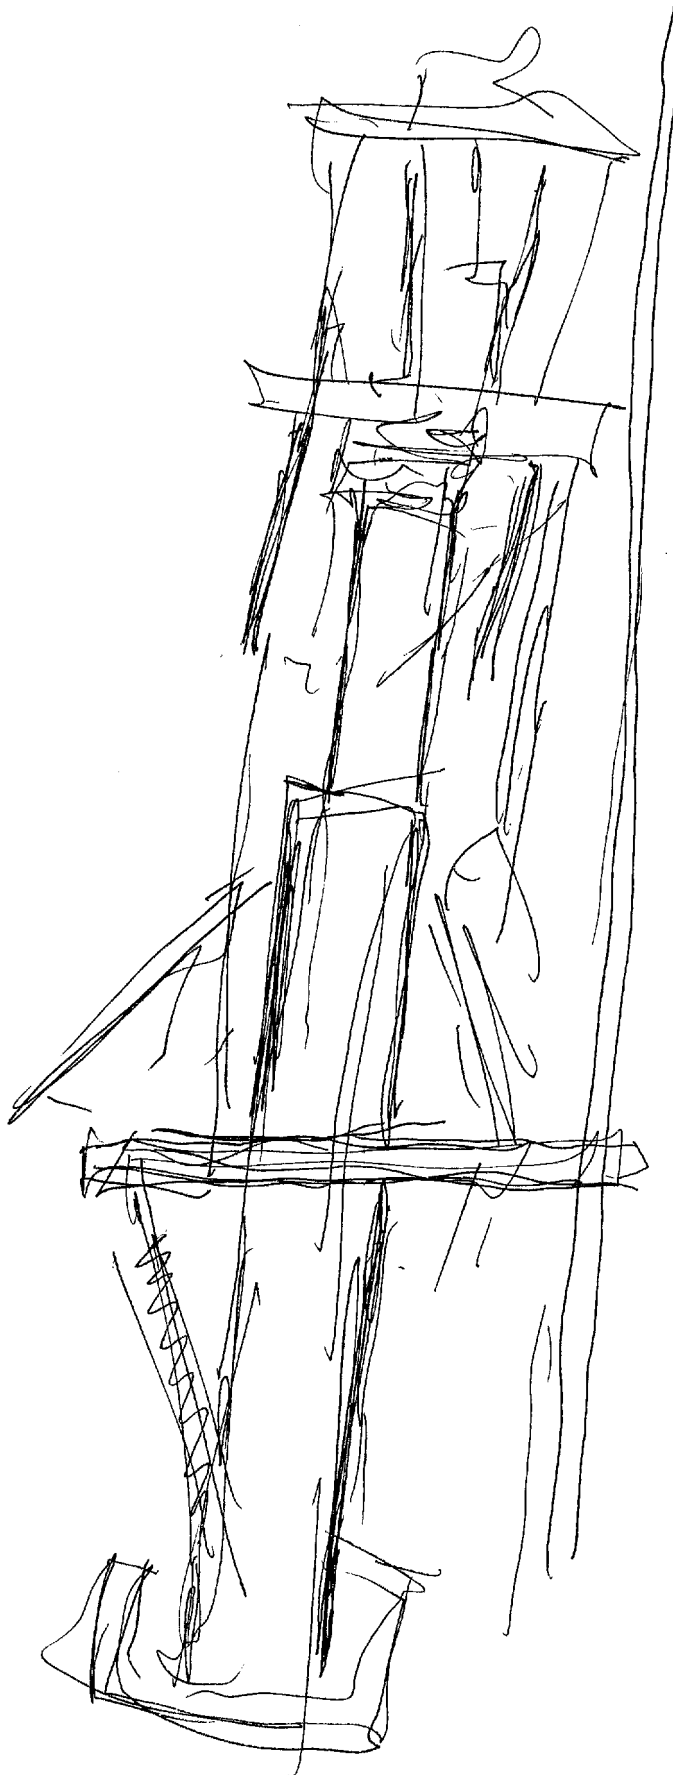

inside

Subj not a device - W. J. J. - like a structural element that does something. Made of lots of metal pieces. Lot of long thin rounded metal pieces that tie it all together. Start to be horizontally & longitudinally oriented. Central "core" sort of a piece throughout the whole thing. Design for when shearing forces to be applied & to

support structure, compression, extension type force as well as twisting and measurement change

24

Engineering

Als "like" a strain gauge Mars length to measure deformation with respect to an absolute sort of scale.

structure

So 1/2 time that structure is neither largest nor smallest in UZ units - medium in between. Something different about dimensions - it's not just regular as square of rectangular sort of thing.

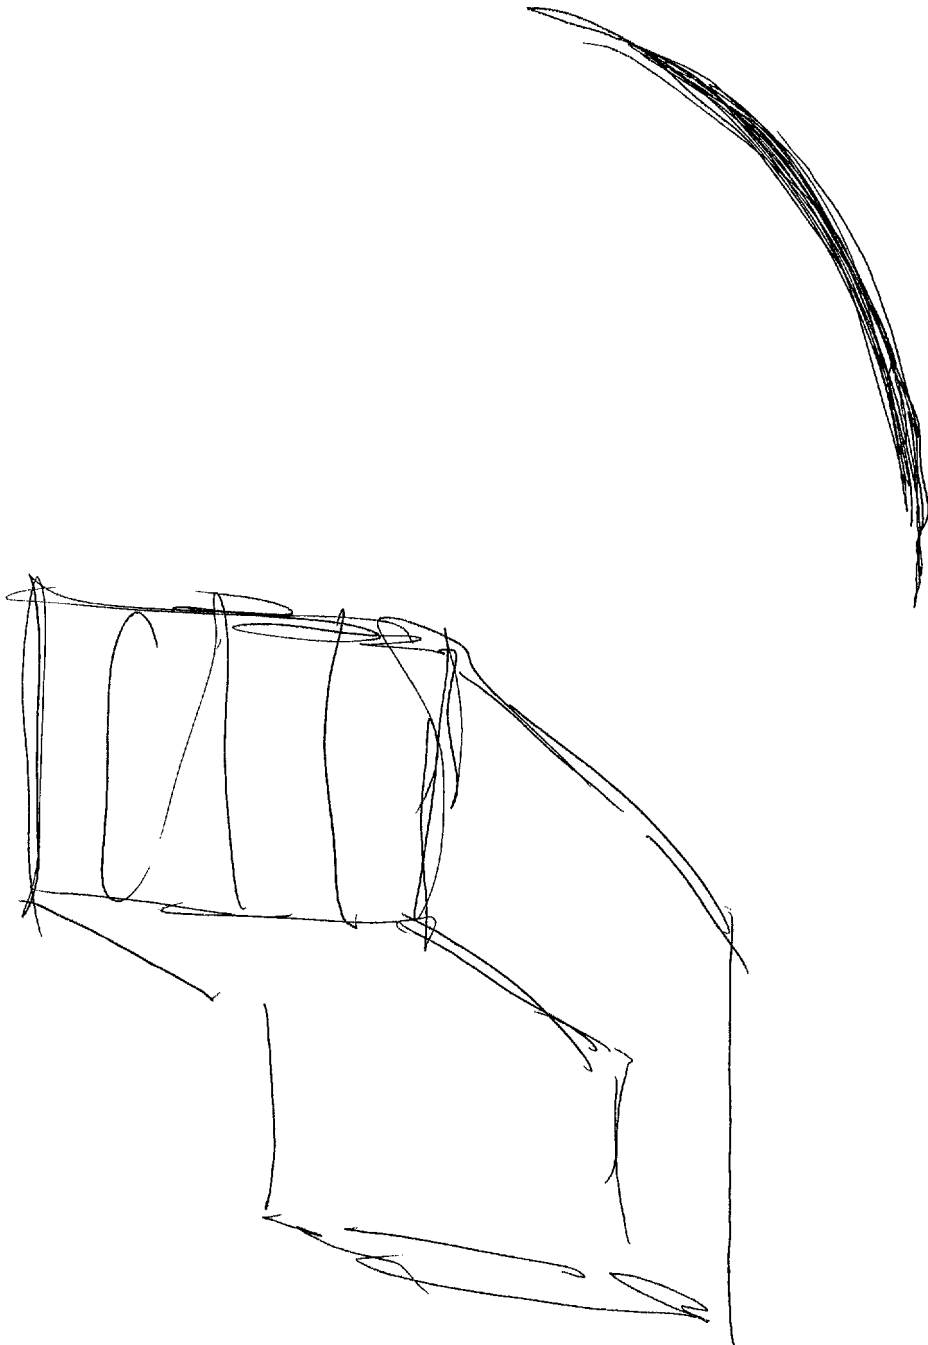

Seems there's something bound about it, though not necessarily apparent externally more than one floor. Same part stills out
