Summary of Information

There are people at the site, jumping back from something around which they had been gathered, as if startled or surprised. There is an "obnoxious" smell—a chemical smell—as well as a bright, searing light, and a large degree of disarray and disorder. A large, white cylindrical object with rounded ends (reminiscent of a propane tank) is connected with what is going on. (ADL Break of JPL) A sense of suddenness and trauma—both emotional and material—is present. A hissing, coughing sound, along with the sense of "fast burning" as opposed to "exploding" is involved. The chemicals present had something to do with it. This is a technological site of some sort, ADL/S of chemical plant, except the chemicals present are not produced here; they are only stored and used here as a secondary part of accomplishing the primary purpose, which is some^{sort} of assembly of a final end product that involves long, rounded segments, suggesting ADL/S of missile or space vehicle.

WORKING PAPER

TASKER

1. PROJECT: 8926.
2. ENCRYPTED COORDINATES: 815470/766420.
3. BACKGROUND: See your Summary of Information (SOI) reflecting the data obtained in Session 01 on 7 September 1989.
4. ESSENTIAL ELEMENTS OF INFORMATION:
 - a. A determination of the key activity at the specific geographical location represented by Encrypted Coordinates 815470/766420 is the goal of this project. See your SOI dated 7 Sep 1989.
 - b. Your SOI indicates that people are "engrossed in what they are involved." Determine and describe the essence of this involvement.
 - c. Other key concepts that will allow for expansion on the activity of interest are: "Sensation of sudden pressure," the presence of "bright colors," and element of "concave and convex," and suggestions of "car-bomb builders or electronic circuit assemblers."
