

AOL - pullout from Afghanistan

into the west  
high, many - like high hills  
broad range  
area a interest lies within the range

[area of interest]

Needs to get into the area.

[purpose]

I  
penetration (area)  
loc's  
protect rear/flank

4 1/2 - seems standard enough; Areas to the N/E & S are open and defensibly (visibly) not difficult. Mts/hills to the West are a security threat. Seems like several attacks (by a/c-rebels) have come from this direction. Seeks to interdict or possibly surround attackers. Possible less than 2 Divisions reg. units.

The primary job is security/protection for N-S corridor  
out in front.

### Mission

Hold area  
Secure LOC's  
Respond to orders from high

Patrols sent into hills - patrolling is part of measures taken.

Seems all fairly standard, but his presence (skulls, etc) are required to ~~be~~ ~~maintain~~ - capable person needed.

A/S - could be a Sov Gen Staff officer - would do well as SGO.  
become
