SECTION II

This section deals exclusively with the accuracy of the information provided, not its usefulness. Responses are scaled from 0-3 utilizing the following explanatory criteria. If a source has not addressed a particular item then select UNKNOWN. If a source describes an item which cannot be verified then select CANNOT BE DETERMINED.

0 - Little or no correspondence with known or suspected components of the target site.

1 - Evidence that the proper target site is being described, however the information contains a mixture of correct and incorrect elements.

2 - Good site correspondence with several items recognizable or confirmatory in nature but some incorrect or irrelevant information is reported.

3 - Good correspondence with the target with unambiguous and unique information and relatively little known incorrect information.

	0-3	UNKNOWN	CANNOT BE DETERMINED
IIa - Geographic locale description, i.e., terrain, bodies of water, mountains, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
IIb - Large scale manmade objects, i.e., cities, rail yards, silos, docks, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
IIc - Small scale manmade structures, i.e., antennae, computers, vehicles, missiles, small buildings, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
II d.- General target functions, i.e., research, production, training, storage, troop billets, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

SECTION IV

This organization solicits your frank and informal comment on any aspect of this project which could better aid us in providing high quality intelligence to the consumer. Please feel free to use the space below or additional sheets of paper as necessary to convey your thoughts.

Re SESSION 01, SOURCE 03: Even though this session was considered as being "off line", certain indicators (old world city....radio microwave tower...presence of antennas....technical aspects [NSA]) appeared to have crept in the signal line.

RE session 02, SOURCE 03: Source was instructed to sketch a hemisphere over a tall, previously perceived structure when admittedly, SESSION 01 was a "bust." This appeared to influence and even encourage Source 003 in pursuing a false trail.

*Utility Assessments should not be conducted against suspected sites but against known sites. See comments re Source 101 - Same Project.*
