pale  
entering data in  
records - what is

people - subjects (identified by numbers)  
she's detached. No feeling of any  
kind displayed for the people  
involved - as though they have  
no personal identity.

Forgotten - no past, no present.  
no body cars.

Collecting various data to  
be used in future  
"experiments" to point  
out what's wrong / what's  
right to avoid previous  
errors. Refine procedures/  
techniques.

As fresh -  
mague-like  
pieces of people

Origin - disoriented persons

App fresh-like  
from a mental  
institution

Spontaneous-like

dragged into this state

holding pen

As - fresh - like  
a holding  
pen

Zombie - like  
body being kept  
alive

tolerance  
levels

As fresh - people of various ages, both sexes,  
some healthy, others with a variety of physical  
ailments are being given substances on a regular  
basis to determine effect, which is determined  
by the amount of substance injected into veins (like death by)

and the results are used to determine the  
effect of certain substances on humans.

Second floor of area 2 contains 2 distinct areas - one a classroom type room with black boards on which symbols are written, the other a library type room containing many books, some of which have red bindings. These books contain records of people, identified by ~~name~~ number who have been used to determine the effects of substances being introduced to their bodies (virus or An flesh). The results are obtained by autopsy, entered into a data bank and used to refine or restructure future "experiments". The people used are zombie like during the introduction of the substances and are "An" like people with no home - no one cares about them and no one misses them. An flesh-like patients in mental institution
