room light

Se's "like" its inside one party which is within a larger  
room - entrance that is brightly lit w/ cool flat light  
& is present unoccupied.

Adh - Impression that document is missing + person who owns it  
has asked us to find it.

Sel's like in a flower in a Wohnzimmer - HL's impression of  
an unmade bed / nightstand / etc. Small, slightly claustrophobic - reminds me  
of the sort of bedroom one finds in a older trailer home - small  
windows or none at all. Unadorned lighting with weak bulbs.

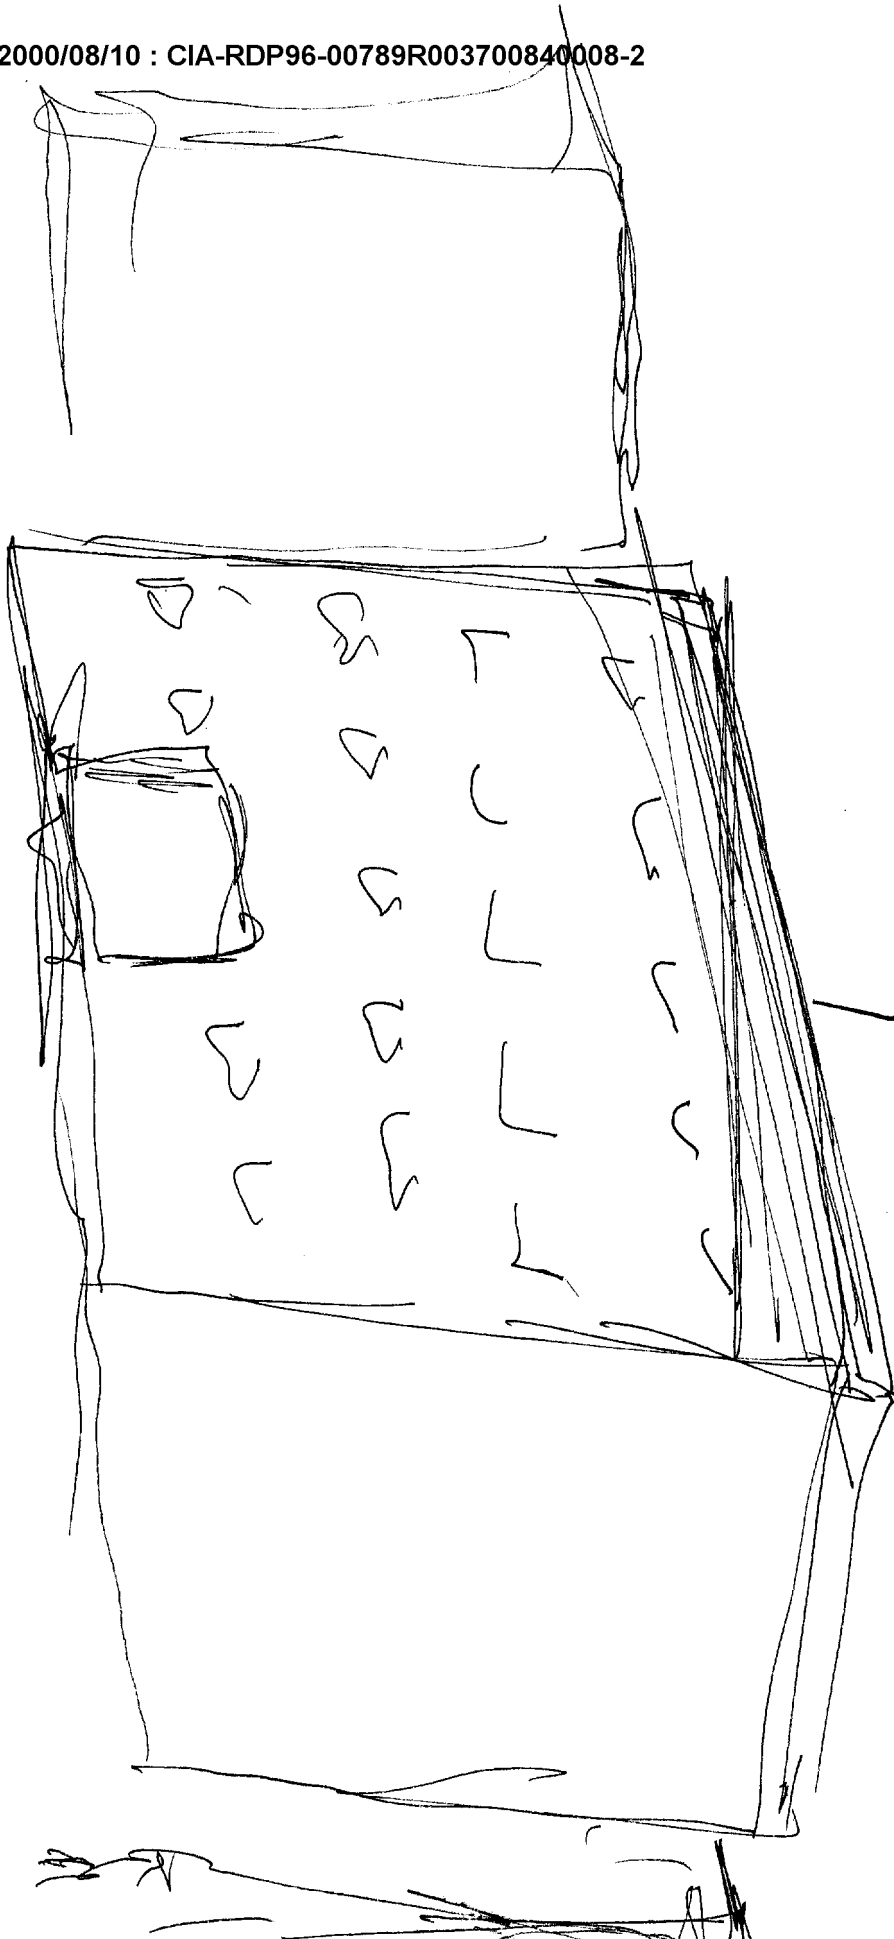

AL BK  
few of  
depression

Sel's one door wide inside some dark, wood grain-like, add a  
claustrophobic impression. Mirror. Rest of Wohnung similar  
disheveled. Impression of "living unit" - not individual house,  
but one unit of collective living arrangement "like"  
apartment bldg, trailer court ~ similar. Seem uniform  
structure rectangular levels. Open similar nearly

"like" apartment complex. Minimal yard/ lawn.

S4's apartment perceived may not be document location, but have something to do with someone who had something to do with document.

location reminds me of Anacostia

S4's person to whom place belongs spends long periods during day away from it. It's not exactly a "place of refuge," but rather a place person has to go to but doesn't think much about as a place to be in of itself. Person is male fairly solid. medium height. Not the best taste in dress. Expediently rules over fashion. The sort of person who might be inclined to wear checks with stripes. Not young anymore but not especially old - i.e. late 30's to late 40's. Dark hair. Brown is a color associated with this guy - like he likes brown, or everything he has is brown.

Does some distant circuitous route to where he occupies himself during the day. Office environment. Anyway, further sort of a place. One can be lost in the "establishment" and go on for years doing job without attracting attention. Processing. Clearly work. "Like" sort of centralized dispatches numbers a transfer point where things come in are shifted around & go out again to get list of distribution "routes" a destination or whatever.

person

S2's not laborer - is more white-collar sort, though  
is still "cog in the machine" - not really management,  
though has some related responsibilities.
