

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8728

SESSION NUMBER: 5

DATE OF SESSION: 21 JAN 88

DATE OF REPORT: 27 JAN 88

START: 1347

END: 1419

METHODOLOGY: CRV

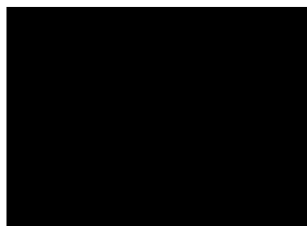

VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: As one element of a larger tasking package, determine the location of a classified document which, based upon corroborative data, is assumed to be within the Washington D.C. metropolitan area.

2. (S/NF/SK) VIEWER TASKING: The viewer was informed that this was to be a "new" project; it was, however, only a new aspect of an ongoing one--namely, an attempt to give 003 a "clean" start (i.e., no review of previous sessions). Nevertheless, the viewer ended up sketching the DIAC once again (in Stage 3) which prompted the query "Is this the same target that we have been working?". After the monitor responded in the affirmative and explained the intended strategy, 003 was directed to acquire the building in which the document is presently located. This was accomplished along with an attempt, via Stage 6 sketching, to place the building with respect to the Beltway.

3. (S/NF/SK) COMMENTS: The description of the building itself is probably very accurate--003 perennially does well on this type of task. With regard to location, 003 has always had fair success, providing "ballpark" data, but so much AOL is associated with the target that, in this case, a low confidence level should apply to the Stage 6 data.

~~SECRET~~/NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

Summary

First part of session dealt with a site already described numerous times, conforming to a general description of the DIAC and vicinity. Second part of site involved a more open, vegetated, hilly area with intermittent sunlight. Grass, trees, structures, roads, and mild hills are all intermingled. Has sense of a nice, upper middle class residential area that has been established for some time. Impression of west side of D.C. inside beltway, other side of river. Quiet, curbed roads curve through area up and down hills along contours. A structure is present that is "like" a house, masonry construction, perhaps light grey stone, with "L" shape or wing behind, stairs up to front entrance from grassy front area sloping up from one of the residential roads. Though structure looks like a house, it also has the air of an other than residential purpose "like" an office or HQ or etc., in a converted dwelling place. Two floors. Internal activities are not exclusive to this location. It's "like" it's part of a larger federation/organization/agency--a group of people bound together by a common purpose and goal but more constraints than just voluntary. A brief perception of a rounded, thin-walled, metal object secured to the an overhead surface. Reminds me of some sort of vent or duct. People pass under it going to and from various destinations, and don't give it a second thought. It seems to be inside a structure, or at least on the underside of an overhang. AOL/S//AOL/Bk of it having some connection--possibly obscure--with the president.
