- E. SESSION SUMMARY

The target is a mountainous structure in size and is steep to climb. It is rugged and rough in texture and consists of earth tones. It is also similar to a tower and is wider than it is long. Even though the facade of the structure is steep it has elongated openings which are semi-pointed carved out of its surface. It can appear quite ominous in its stature on land and water can be found in the vicinity. The structure has an old appeal and is symbolic of a source of wisdom to some people in its cultural significance.
