- E. SESSION SUMMARY

The target has a female associated with a structure which represents opulence, power, and prestige. Adornment, and gold decorations are prevalent. The structure is massive in size and represents a period in history which reflects a culture and the way some people lived during that time. It is bright and sunny at this location and water is not too far from the site. The segment of the population depicted from this target include the elite or powerful members of a society.

TRACKED BY CIA'S PLANES and scientists in instrumented vans, the flying lab drifts over Illinois and into Indiana (map), still riding in the same cloud of pollution bequeathed by St. Louis as the day before. The drifting platform (right) provides a unique method of studying air. Airplanes cannot stay in the air long enough to test, and fixed, ground-based instruments can measure only the segments of air that pass by.
