- E. SESSION SUMMARY

The target is a rectangular metallic structure or object which has a reflective, mirror like surface. The colors blue and yellow/gold are present. Water may be in the area. The structure has an inside and an outside and can be used as a tool for some type of work. It may be considered wise and somewhat powerful to some people. People work in association with this structure and it offers a technique in aiding people. There is a lot of activity around the site including communications and I feel people have a healthy respect for the target. The surface is as smooth as glass and it is attractive in its over all design. The target may be business related and somewhat inspirational for people because its symbol hits "close to home".

CPYRGHT

Water towers pierce the Kuwait skyline like minarets. They will brim with hundreds of thousands of gallons of desalinized drinking water from the Gulf—and carry a bonus for visitors. From the top platform of the tower at right, patrons of a revolving coffee shop will enjoy a 360-degree panorama of sea and sand, while a stationary restaurant will ring the lower sphere.
