E. SESSION SUMMARY:

SG1A

Can not access [redacted] ; could barely access the vessel. I became very cold suddenly ; perceived darkness, decay ; corrosion. There was a "crystalline" structure associated w/ [redacted] SG1A

The concept of a tube-like object/feature with openings to the air where were perceived. Some of these were reminiscent of inlet intake - outlet features, yet some were not all functional. There were two groups of 3 or either side of the vessel. The concept of a "tube within a tube" was associated with these features.

Also perceived a flat panel-like feature w/ circular objects on it as well as an area of a wall with cross members or bracing within in.

Also heard growling animals.

Final analysis: I'm not sure that the vessel is individual one still present, let alone, [redacted]
