

The Beijing Immunology Research Center's The Study of the Science of Qigong (no date) relates the effects of the practice of Qigong on the EEG and Cerebral Hemograms.

Relationship between Qigong & Parapsychology

1. Chinese researchers are committed to the concept of "functional states," therefore they are interested in how a person passes from the "normal" state to the "Qigong" state hoping it will shed light on how people pass into the "parapsychological" state

~~2. Qigong practitioners~~

~~2. Those who practice Qigong~~

2. The practice of Qigong is believed to enhance one's psychic abilities.

6

According to the Beijing ~~Base~~ Immunity Research Center, Beijing, the development of Qigong studies from 1979 to 1988 has been unprecedented in Qigong history. The quality and quantity of the research papers were also unprecedented. For example in 1979 only 13 Qigong Science Research Papers were published. By 1988 the number had risen to 831 with 4,591 papers over the 10 year period. In 1979 there were only 6 papers dealing with the theoretical and experimental aspects of Qigong. By 1988 that number had risen to 233.
