Memorandum for C/PPG

Subject: Senior Review Panel Comments on Draft Notice on
NFAC Intelligence Publications, dated 22 Oct 79

1. The Panel believes that the draft NFAC Notice marks a distinct improvement in the policy and administrative guidance pertaining to NFAC production. The Notice is written in a clear, straightforward and easily understood manner.

2. We have only one procedural comment on the NFAC publication categories. It is not clear who determines which art form is to be used in the production process. Presumably the production offices will make the initial determination of the appropriate art form, but if so, this should be spelled out, perhaps in the introductory paragraph. Unless this procedural matter is made clear, the production offices may assume that PPG will make this determination.
