Supplement to the Third Point of my stated project

Recommendation of the people for the information (intelligence) group, which will collect information inside Bulgaria ~~will be performed by each individual~~ will be based on personal investigation of each individual. I have information about approx. 10 people who are in Turkey, Greece, Italy and Austria that can perform this work. They will be approached personally and chosen. Training and preparation of these people will be done separately - ~~in groups~~ each group in this manner, that each ~~one~~ person will ~~not know~~ know the remaining ~~one~~ except 1-2 people of his group. For recruitment of the people, it will be necessary to have at least 3 months and the same amount of time for their preparation before the Occupation. At the same time that the recruiting is going on and the preparations are being made - there will gather - from the newly arrived emigres - information about internal conditions - of which/our friends where can they be , are they still free, how do they manifest (show), and to what extent can they be ~~not~~ utilized. In order to collect this information personally it will be necessary for me to meet the newly arrived ~~new~~ refugees (emigres) from Bulgaria in neighboring countries. Verification if some of our friends inside are free will be made by round-about (devious) methods. I can choose from among 100⁵⁰ friends inside, the most suitable and trustworthy ones. Prior to the undertaking of this task ~~existing~~ there will be a detailed plan presented.
