

### Bosnia and Hercegovina: The Humanitarian Situation Under Four Scenarios (a)

#### Good Security

Additional deaths due to humanitarian situation: 13,000 (b)

Potential living conditions:

92 % receive food-at adequate levels  
8 % receive little or no food

Good

43 % in family homes ok for winter  
35 % in communal shelters-marginally ok for winter  
22 % in inadequate or no shelter

90 % receive medical aid--at adequate levels  
10 % do not receive medical aid

Additional deaths due to humanitarian situation: 116,000

Potential living conditions:

43 % receive food-although may not be adequate levels  
57 % receive little or no food

Bad

30 % in family homes ok for winter  
25 % in communal shelters-marginally ok for winter  
45 % in inadequate or no shelter

40 % receive medical aid--although may not be adequate levels  
60 % do not receive medical aid

#### Bad Security

Additional deaths due to humanitarian situation: 77,000

Potential living conditions:

54 % receive food-although may not be adequate levels  
46 % receive little or no food

39 % in family homes ok for winter  
29 % in communal shelters-marginally ok for winter  
32 % in inadequate or no shelter

50 % receive medical aid--although may not be adequate levels  
50 % do not receive medical aid

Additional deaths due to humanitarian situation: 217,000

Potential living conditions:

30 % receive food-although may not be adequate levels  
70 % receive little or no food

12 % in family homes ok for winter  
15 % in communal shelters-marginally ok for winter  
73 % in inadequate or no shelter

25 % receive medical aid--although may not be adequate levels  
75 % do not receive medical aid

(a) Based on population in need of 1,350,000.  
(b) Number of deaths is for the period 1 October 1992-30 April 1993.  
Normally about 12,000 people would die during a six-month period in Bosnia and Hercegovina.
