

RELEASE AS SANITIZED

Representative

2003

Briefing of []

General:

a. Subject will be the PBSUCCESS representative for [] and direct all PM, PP and FI matters under the direction of LINCOLN and coordination with []

b. The representative will be placed in contact with SEQUIN, who is presently in overall charge of the CALLIGERIS organization in []. This channel can be used as a means of contact with PM, PP and FI personnel.

c. The PM program will be the most complex and that in which there will be the most activity provide [] gives his full consent and fully cooperates. The most important, immediate part of this program will be the shipment of arms into Guatemala.

Routes and means for shipment of arms:

Meet the necessary station contacts, []

[], etc. Station will introduce representative to necessary people.

F/3-f-29

d. The representative will provide LINCOLN with a direct channel to F.A.G.E., the PP organ in []

This group is being directed by the CALLIGERIS organization in [], but a direct, on-the-spot contact is needed.

e. The FI effort in [] is mostly of a CE nature.

Our contacts with immigration and the army G-2 provide us with any information we desire in regard to all people entering or leaving the country.

This gives a fairly good check on couriers being used by the enemy, their destination and whereabouts. We also through these channels have access to information obtained by these two government organs.

f. Political situation in []

Plans are for [] to

- 2 -

contact [] and lay the ground work for [] cooperation.

[] seems in favor of the project but in the past has insisted on assurances of US backing. Since [] is now in line, we are trying to approach him through that country.

- g. The Group representative i [] will keep in contact, refer all future developments, with the [] representative via cable on sensitive matters and by direct courier from [] on routine field operational matters.

For any detailed operational developments the [] representative can come to [] for a conference in a matter of [] minutes by plane and return the following day.

A trip to [] by the [] representative would be the fastest and securest way to introduce him to SEQUIN, who can be called to [] at the same time for the meeting.

h. ERRATIC

The [] representative will take over from JUVIA and JUVIA-2 the ERRATIC contact.

JUVIA-2 has committed himself in such a manner to ERRATIC that it makes it extremely difficult for JUVIA-2 to drop the ERRATIC contact without some means of doing so.

When the [] representative arrives, JUVIA-2 can tell ERRATIC that he has done everything he possibly can and he is now turning the contact over to this new ^{group} representative [] who will review his assets and determine whether the ERRATIC assets are worthwhile giving future backing and making plans for an operation.

This maneuver is being made to take JUVIA-2 off the hook and to keep tabs on ERRATIC. The new representative has to be very careful not to become too involved or make any commitments whatsoever to ERRATIC so that he will not be committed in any way so that he can drop him any time the need arises.

PM

WILL BE INSTRUCTED VIA [] commo as to direction his action on:

1. Aiding SEQUIN OBTAIN jump-off area for approximately 80 men and equipment.
2. Storing 15 (?) tons equipment and gathering these 80 men 15 days prior to D-day.

3. Movement:

By air?

By truck?

Across border of the above 15 (?) tons and subsequent movement to points of launching []

4. Continuation of SKIMMER DTFROGS connections laid on by

[]

5. Commo

SKIMMER-SYNCARP
