Tape Recordings of Guatemalan Radio Programs

1. There are being forwarded tape recordings of local radio programs obtained through an ODACID officer and lasting approximately six and a half hours.
2. It should be noted that these recordings were made by a local employee who, of course, had no idea of their purpose and who made the selections as he saw fit. He stated, after finishing the six and a half hours, that any further recordings would be a repetition of those already made.
3. It is hoped that these will be satisfactory, and your comments will be appreciated.
4. Also attached is a list of the ten tunes currently most played over local radio stations.
