[REDACTED]

Swedes Measure Larger Seismic Magnitude than USAEDS for Soviet Nuclear Explosion: An underground explosion in the Semipalatinsk region of Soviet Siberia on 16 May was recorded by the Uppsala observatory seismographs. The shock waves from the subterranean blast measured magnitudes 5.6 on the Richter scale.

Pakistan Thinks In Terms of Nuclear Weapons: Ahmad Khan, Chairman of the Atomic Energy Commission of Pakistan hinted that Pakistan might be compelled to follow India's example of exploding a nuclear device. He rejected an Indian promise to use nuclear power only for peaceful purposes, and warned that the Indian test had "opened the floodgate for nuclear weapons."
