USSR: Base for Mobile Missile

[redacted] the Soviets are building a mobile missile base, probably for the SS-X-20 IRBM [redacted] in the western USSR. [redacted]

Construction of the base, which is at an SS-4 MRBM site, apparently began in the spring. [redacted]

We have now identified seven mobile missile bases in the USSR, probably for the SS-X-20. Two of the bases in the western USSR and one in the eastern USSR could become operational at any time. The base [redacted] and three others—one each in the western, central, and eastern USSR—are likely to be completed in 1978. [redacted]
