possibility that some space related vehicles may be tested possibly including boosted re-entry to simulate conditions encountered on return from lunar missions.

d. Moscow says the tests for the next six weeks will involve "new versions of multistage carrier rockets."

e. Three Soviet range instrumentation ships are now approaching the farther of the two impact areas which will be used.

3. East Germany-West Germany a. West German Social Democrats will be in for a bad time this week when they enter East Germany on their way to and from a meeting in West Berlin.

b. Indications so far are that they will be subjected at least to an intensive propaganda barrage.

c. The Social Democrats have always made a point of travelling overland rather than by air corridor to meetings in West Berlin to emphasize German unity and their right to travel through East Germany.

50X1

## 4. Congo

- a. Gardiner is now somewhat encouraged by Adoula's action yesterday in agreeing to halt troop movements in north Katanga, in accepting arrangements for deposit of Katangan foreign exchange earnings, and in going ahead (next week) with the amnesty law to be followed by an oath of allegiance by top Katangan officers.
- b. Barring the alwayspresent possibility of last minute hitches, agreements on these matters were to have been signed last night,

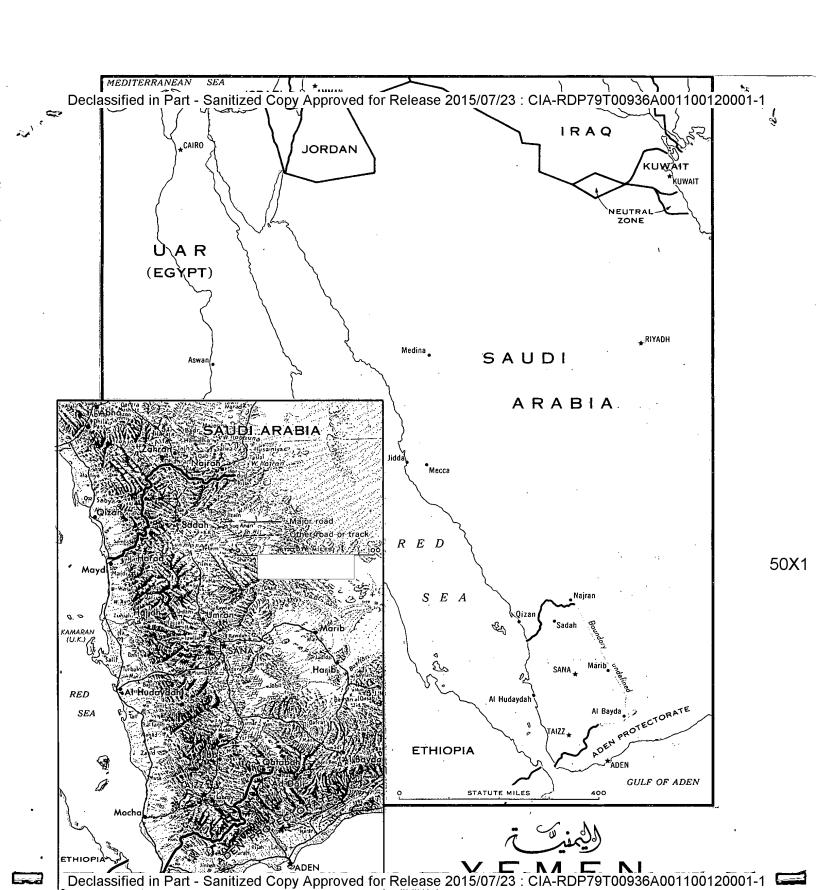

draft constitution today for consideration by assembled provisional presidents and legislative heads. Tshombé was invited by Adoula to attend, but probably will not do so. A Katangan

Adoula will submit the

representative will probably be there, however. This promises to be some go-around.

50X1

c.

5. Yemen

a. We have little further of interest to report on this situation.

claim in Cairo's press that Sadah has been recovered by revolutionary forces. Marib is still held by Hasan's tribesmen.

c. Moscow is dispatching five more AN-12 cargo aircraft to Egypt, presumably to speed assistance to Yemen. Cairo

is short of trained air crews to run them and has been trying to round some up in Czechoslovakia and Yugoslavia as well as in the USSR.

d. The runways in Yemen are treacherous, and, although Soviet pilots have recently landed AN-12's there, the operation is at best tricky.
