July 19, 2007

I'd like to make a FOIA request for documents related to Google, the Internet search engine based in Mountain View, Calif. My request is for the following:

- 1) All contracts involving Google as a vendor, product supplier or consultant from Aug. 1, 2006 to the present
- 2) The 500 most recent e-mails to and from the address ending with @google.com, Google's corporate e-mail domain, that meet the following criteria:
 - Should be a server based search of live e-mails, not archived e-mails.
 - Search should be conducted on three e-mail servers that are used primarily CIA headquarters e-mail. Searching more servers is necessary only if you fail to find enough responsive e-mails from the first three servers.
 - E-mails released should not be duplicative (for example, I'm only interested in the final e-mail of a back-and-forth conversation as long as that e-mail also contains earlier messages in the string).
 - E-mails released should have at least 50 percent of the contents visible following any redactions (e-mails with less material visible, and therefore unresponsive to my request, should not be counted to the 500 total that I am seeking).

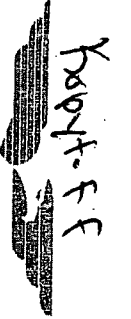

2007 JUL 30 AM 8:44

I'm willing to pay all necessary processing fees. However, I may be eligible for a waiver for some or all of the costs based on my job as a journalist. If you have any questions, please contact me.

Thank You,

Verne Kopytoff
