(b)(6)

Request:

"Gangstalking" is a type of extrajudicial harassment program with similarities to the FBI's COINTELPRO program and the Stasi's Zersetzung program which targeted political opponents.

Both the CIA and foreign intelligence agencies regularly harass targets (often terror suspects or whistleblowers) using gangstalking programs.

Gangstalking can include: Bribery of the target's friends or family, gaslighting, home break-ins, libel, slander, the use of microwave weapons on a target, baiting (the target is encouraged to commit crimes by agent provocateurs), vehicle sabotage, physical surveillance, illegal wiretaps, bugging, electronic device hacking using software exploits, etc.

The CIA's program most likely has a code name which I do not know.

Victims of gangstalking programs call themselves "targeted individuals".

1. All records pertaining to gangstalking operations by the CIA or their contractors against domestic targets, specifically those which are carried out in violation of Executive Order 12333.
2. All records pertaining to gangstalking operations by the CIA or their contractors against foreign targets.
3. All records pertaining to any gangstalking programs that foreign intelligence agencies have.
4. All records pertaining to any street theater application or GPS tracking spyware which is used for street theater.

Definition of street theater: The target's phone is hacked and infected with GPS tracking spyware, strangers are then hired to locate the target using a mobile app and start fights with the target or threaten them. I am looking for source code, binary copies of the apps, etc.

5. All records that come up for the keyword search "targeted individuals" and which are related to gangstalking.

Fee Waiver:

Fee waiver requested:

Public interest & no commercial interest

If my fee waiver is denied I will pay up to \$100
