=====  
[redacted] an NBC crew will be filming at the A-12 on Saturday. We were out there today and noticed hornets. Could FS see what they can do? I noticed hornets/wasps flying into the space between the top north pylon and the airframe as well as wasps/hornets flying into some of the louvered areas on the belly of the plane forward of the north pylon about halfway to the nose. They have historically been found in the starboard nacelle as well. I will be at the museum storage facility tomorrow at [redacted] Call me there if needed. [redacted] will be here at HQS 1000-1600 and [redacted] will be in on Thursday, I will be here all day on Friday. Thanks for anything you can do. We wouldn't want any of the crew stung out there while filming. All best, T
