

Re.: Dr. LUNK-WASHINGTON  
Inquiry from Mr. LUCID

The question put from Washington can all be answered except one. The man living in London, who shall carry out the action "Dr. LUNK", is a Czechoslovakian emigrant, whose name has not been found out. (The mediator in Vienna is just on a courier's travel.) He is planning to emigrate to Australia, because he has got no chance to make a living in London. He will stay permanently in Australia and has no intention to return. The precise place of his destination in Australia is not yet known, but the mediator was instructed to report about it immediately. Further on the man will be requested not to take the ship to be at disposal for an eventually planned action. About the motives of the man in London nothing can be said as it wasn't he, who had the idea, but our confidant in Vienna who suggested to charge his acquaintance in London with the bribing of Dr. LUNK, as the former has done this once already successfully. The man in London knows nothing about this plan and he will not be informed as long as the decision of Washington has not arrived, that the action should be executed. An urgent reply is requested as it cannot be justified to keep him back longer from his voyage if we don't know whether we shall need him or not.
