Operational

Wilhelm HOETTL's approach to Questions 201

Reference: MASA 1205, SALZ 238 and WASH 22315

1. Further discussions here lead us to feel action as proposed in Para 3, MASA 1205 may be somewhat premature. A well documented case of CAPOTE's use of unacceptable ex-RSHA types such as HOETTL could very well give us sufficient leverage to resolve any ZIPPER-CAPOTE differences which might arise in the future, to our advantage.

[redacted] proposes discussing this case with you on his coming field trip. It is suggested no action be taken pending this discussion.
