TO : Chief, EE

DATE: 7 June 1952

FROM : Chief of Station, Frankfurt ^W

SUBJECT: GENERAL—Operational/REDSOX

SPECIFIC—Carriage Test of Capelin on 6 June 1952

1. Purpose of Test: Assessment, control, and specific.
2. Procedure: Standard, using subject's secondary language, German.
3. Estimated Reliability of Test Results: Subject's pattern showed clearly that he is suffering from the effects of long-continued clandestine life; specific responses were slight and ability to rationalize was very high. It is estimated that the results — on the main issues only — are barely in the "fairly reliable" category in the scale of "reliable", "fairly reliable", and "unreliable".
4. Summary of the Test Results: Subject appears to be the person he claims to be and not to be either a criminal or an enemy agent. Subject appears to be operating from motives friendly to our interests. Subject showed a certain amount of sensitivity to the question: Did you ever knowingly do secret work for Soviet-Russians, UB, or Communists? which he answered "No". He explained this sensitivity by stating that, although he had express permission to deal with the YIS, that is, after all, a "Communist" service. After this explanation, sensitivity declined, and it is believed that subject is not hiding anything of importance in this connection. While subject appears to have told the main truth about his past, he continued to be slightly unhappy with the question: "Are you trying to conceal something officially important about your past from me?" which he answered "No". Subject made a partial admission in that he stated the medals he had been awarded had not been awarded "officially" but that his superior had told him he would get them. He had never got them. It would appear that subject is withholding information of probably secondary importance about his past. Subject appears to have told the truth about his relations with and security toward the emigration, and explained that his whole success with them depended on his being able to conceal from them his connection with us; i. e., subject does not appear to be trading information but services of a liaison nature between the two hostile groups. Subject does not appear to be concealing major sources of income not reported to us. There may be somewhat more to subject's connections with the Italian IS than he states, but serious deception in this regard does not appear indicated. Subject does not appear to be seriously involved with German, French, or British IS. Subject appears to be generally secure.
5. Appraisal of subject: An intelligent "operator" who knows how to "keep his nose clean" and who is glib and has great presence of mind — quite capable of playing the alleged role. Nervous system shows "clandestinity" and double-life damage.
6. Recommendations: IF SUBJECT IS SUBSEQUENTLY FOUND TO BE LYING ON A MAJOR ISSUE RAISED.
