MARKED FOR INDEXING
NO INDEXING REQUIRED
INDEXING CAN BE JUDGED
BY QUALIFIED HQ. DESK ONLY

Ref: OETA-10603, dated 19 April 1960

1. The Chief of Base, WUNICH, has transmitted to us with the dispatch of reference, a packet containing a pair of trousers and other material, with the request that a study be made to determine if AEDORA-1's illness was caused by a contact poison.

2. Since this laboratory is not particularly equipped for this kind of work, we are referring the problem to you. We are therefore transmitting, under separate cover as Attachment #1, the packet as received from Chief of Base, WUNICH.

3. For your convenience and in order to expedite the handling of this material, we are sending, as Attachment #2, a copy of the reference and all the information transmitted to METOPAZ with it. We would appreciate if you could keep us posted as to the progress made in this analysis and study. At the outset, an estimate of the time this work may take would be desirable. We have no information on contact poisons and wonder if you would care to enlighten us a bit.

ATTACHMENTS:

- #1 - Packet containing trousers and other material
- #2 - Copy of OETA-10603 and Attachments A and D
