OSA 0437-67
24 January 1967

MEMORANDUM FOR: Captain M. D. Carmody
3826 Main Navy

SUBJECT: KW-7 Installation at Main Navy

1. In the spring of 1966 Mr. James A. Cunningham, Jr., requested installation of communications facilities at Main Navy in support of CHIGOE and possibly subsequent REWSON activities. Capt Richard Wilson was assigned as project manager and Mr. Dick Bennett as plant security officer. The equipment was installed in June of 1966 and Mr. Bennett was briefed CRYPTO on 22 August 1966. Our commo people have attempted on several occasions to further indoctrinate Mr. Bennett and train him in the KW-7 operation. The several attempts they have made in the past have, in each instance, been inconvenient to Mr. Bennett for one reason or another.

2. This Office is presently paying \$125 a month for rental of this equipment which has not been utilized to date. We request you review the need for this equipment and in view of its not having been used whether a justification exists, in your opinion, for its continuation.
