26 November 1951

Chief, FDM

Chief of Station, Karlsruhe

Redax Operational

\*Formal Report Carriage Test of Cleveland O. Hahn (AECOR Zlynch)  
on 10 September 1951

1. Object of Test: Assessment
2. Procedure: Standard, using coach a/c subject's mild heart condition.
3. Estimated Reliability of the Test Results: Subject was strongly and consistently responsive. Results are estimated to be "reliable", in the scale of "reliable", "fairly reliable", and "unreliable".
4. Summary of Test Results: Subject appears to be the person he claims to be and not to be or have been an agent of a Communist power. He does not appear to be an agent of an emigre-group he wants to hide from us. He appears to have something he considers criminal on his conscience, but does not appear to be an habitual criminal. Subject appears to be telling the main truth about his life history and motives, but appears to be withholding some facts (apparently not of importance, to judge by the degree of sensitivity) concerning his past.
5. Operator's estimate of Subject: A highly-intelligent and well-balanced personality, mature and experienced. Heart condition could easily be aggravated by continuous nervous or physical strain. Subject appears to have considerable qualities of leadership and seems quite self-critical.
6. Remarks & Recommendations: Subject should not be subjected to severe or long-continued emotional strains. All aspects of an emotional nature strongly affect his heart.

\* Flash Report in detail was passed to Case Officer on 11 September 1951.
