10. FACTS, EVALUATION AND COMMENT: (Use additional plain sheet if necessary)

Note: The LCPROWL Apparat is not a separate project, but remains a part of Project LCPROWL. It is reported here on a separate sheet merely for the purpose of clarity.

a. Mission:

No change

b. Accomplishments:

(1) After a thorough and complete re-evaluation, the field has recommended that the LCPROWL Apparat be phased out entirely and all contacts cauterized with the exception of the present assets in East Germany. If it proves feasible, assets in this Soviet Zone are to be maintained. Only the minimum support structure necessary to supply the East German Apparat is to be continued in West Germany. Every effort will be made to recover as much as the original expenditure as possible from the sale of major physical assets, such as the cover business and the training area in West Germany.

(2) The field's recommendation has so far reached the home office in a summary cable only. A final decision on this recommendation will not be made until the full report is received from the field. At such time, the monthly report will describe in detail the reasons for the field's recommendation and the manner in which this question was finally resolved.

c. Reaction:

None

d. Conclusions:

None

e. Miscellaneous Comments:

None
